

Hither Mann BIO

- World's FIRST female financial trader and educator on a mission to change the face of females in the financial world - a world still heavily dominated by men internationally.
- Self-made Multi-Millionaire and Multiple business owner having started off in the UK and now relocating to Monaco and the French Riviera
- Hither has been in business since 2004, owning businesses ranging from property, financial trading, financial technology, mentoring services, company acquisitions and more recently public listings in Europe and the U.S stock markets.
- She is the Founder & CEO of Fortune Academy, world's first lifetime wealth education company; specialising in allowing clients to take control of their wealth over giving control to banks and expensive asset managers.
- Fortune Academy is actively funding students in her financial trading education programme – up to £2million per client. Together they split the profits.
- Credit Suisse have used Hither this year as a “peak performance coach” to bankers in their Switzerland office. Hither used her knowledge in human behavioural science and neuroscience to help them hit their “billion euro” revenue targets per team.
- Hither also set up a Mental Health Charity called The Fortune Family Foundation – helping the working population have a better relationship with money and help reduce the anxiety involved with “money-related” problems.

Fortune Academy student base

- Vice presidents of Credit Suisse and JP Morgan Chase in London
- Neurosurgeons, Doctors, Dentists, Medical Professionals
- Millionaire business owners
- HNW individuals
- Children from HNW families
- Professional sportsmen such as professional cricketers, athletes,
- Students and Employed individuals who are keen to leave their current employment status

The Fortune Academy philosophy

MINDSET BEFORE MONEY: Hither coaches all her students to reprogram all limiting belief systems related to wealth and previous cultural stereotypes which may be hindering the wealth creation process.

- Hither has a strong set of philosophies on how wealth is acquired:
 - o Inherited / Marriage into wealth requires little/no skill

- Maintaining this type of is very risky since it is often passed onto poor decision makers in asset management firms and family office who charge heavily with little/no performance!
- Creating wealth yourself however requires the highest skill level (which can be taught through Fortune Academy) since it re-sparks the genius skillset that was used to create the wealth in the first place!

Fortune Academy respects that wealthy families may lose a lot of their wealth in succession and thus helps bring that financial control back to the forefront.

Hither provides mentoring so that her students can create wealth through financial trading, business and asset building, as she also does for the HNW business owners in the UK.

Hither's latest project (most relevant to HNW audience)

- Investing into SME industries with minimum EBITDA £1mill.
- Current SME sectors being targeted are medical (Harley St in London), legal and construction.
- Hither is currently making acquisitions of the SME companies into a group holding which she will list onto a main market exchange in Europe with a separate listing in the US main market.
- The IPO structure is designed to help scale entrepreneurial companies through routes a traditional bank would overlook.
- Hither is supporting SME companies that would never get such opportunities from a banking system and thus once again, celebrating the entrepreneurial, "self-made" spirit which is integral to her business approach.
- Hither will be holding investor meetings in Monaco and Mayfair to encourage similar companies and entrepreneurs to scale internationally.
- Hither also plans to hold financial trading events in Monaco for HNW individuals who want to control their wealth curve better than an asset management service.
- Hither particularly wants to see more women in Monaco learn the art of financial trading so that they can ensure a financial independent future!
